

Improving Workplace Safety & Efficiency

It is our goal to design, manufacture and market products to improve workplace safety and efficiency. We listen to our customers and use their feedback to develop new products and can custom design a system to meet their needs.

A History of Safety Technology and Success

ALERT Safety Products designs and manufactures innovative Forklift Warning Systems. We use microwave sensors to detect forklifts and other vehicles as they approach intersections, blind corners and doors. The system will give a two-to-four second advance warning for pedestrians and other forklift operators at the critical area.

If you have forklifts and would like to improve safety, give us a call at (513) 791-4790.

Our Leading-Edge Products Include the Following ALERT Technology Systems:

Project ALERT - Forklift Safety Projector

Warns pedestrians of approaching forklift traffic and is activated only by approaching forklifts—not by pedestrians or forklifts exiting the area. Project ALERT improves safety at pedestrian walkways and blind corners.

Mirror ALERT - Active Mirror Warning System

Microwave sensors detect approaching forklifts and turn a passive mirror into an active warning device. The Mirror ALERT has an optional floor light and is available in different sizes, it is available in different configurations and can be customized to meet your needs at a particular area.

Office ALERT - LED Caution Signs

The Office ALERT will warn workers before they exit an office and step into an active forklift aisle. We also have other LED Caution Signs for T Intersections and blind corners.

ALERT Safety Products Offers Several Advantages as an Industry Expert and Marketplace Leader

Advanced Products

ALERT Safety's products are technologically advanced in the marketplace, and have a proven record of results.

Consultative Approach

ALERT Safety has the knowledge, experience, skills and capabilities to be more than just a supplier or provider of safety products. We evaluate the client's challenges, and custom-design your workplace solution.

Customer Relationships

ALERT Safety Products practices the value of building client relationships. Our high referral rate from existing customers highlights the value of trust and legacy of success.

Guarantee

Purchasing from ALERT Safety Products is virtually risk-free, based on product innovation, integrity and warranty. Thoroughly tested and 100% proven. Our products are warranted for one year, and we stand behind that guarantee.

Our Warning Systems are Designed to:

1. Create advanced warning systems
2. Prevent potential problems and accidents
3. Enhance overall worker safety
4. Lower the number/severity of Worker's Compensation and Insurance claims
5. Improve plant safety and worker morale
