Forklift Warning Systems

KEEP YOUR EMPLOYEES
SAFE

Mirror ALERT

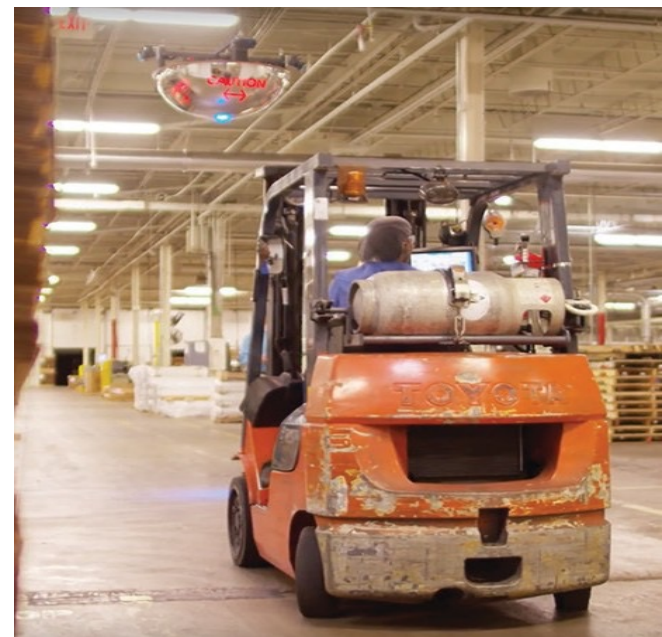

Our patented Mirror Alert has intelligent sensors that detect forklifts and other vehicles as they approach an intersection or blind corner. When activated, Mirror Alert will flash a "CAUTION" message and an arrow indicating the direction of a forklift or other piece of moving equipment, drastically reducing the risk of injury.

Mirror Alert

Mirror Alert Systems are available in 36" and 48" diameters and are perfect for 2, 3 and 4-way intersections.

Other features include:

- Sensors have an adjustable range up to 60' and can be programmed to detect equipment only, pedestrians only or both.
- Alerts to approaching equipment or pedestrians entering the intersection, not moving away from it.
- Can be integrated with other Alert Safety products for the ultimate safety solution.
- Optional floor light is available for extra visibility at the floor level.
- Comes complete and ready to install.
